Mobile applications

- Cloud video surveillance app
- Live streams, archive and events on mobile 3G /4G/5G
- Access EDGE storage SD card or NVR's HDD
- Easily share your video streams and clips with only those who you decide
- Push, Email and IM notifications
- Telegram Chat Bot
- iPad Video System Controller app (Roadmap 2021)

iOS

Android

Monitoring station software integration

immix

PatriotSystems

AI video- analytics

- Cloud based or on-premise
- Works with any video source
- Multitenant user management
- Web client
- Flexible reports (Power Bi)

Video analytics **available**

vCloud.ai

Auto traffic monitoring

ANPR

Gate access automation

Face recognition

Attendance control

Helmet detection

Motion detection

Heat maps

Age and gender estimation

Queue detection

Smoke & fire detection

Crowd detection

Object detection (human, vehicle, bicycle, motorcycles, busses, trucks)

AI-based object detector

- Human detection
- Animal detection
- Bicycle detection
- Motorcycle detection
- Car detection
- Bus detection
- Truck detection
- Abandoned bag

Face recognition

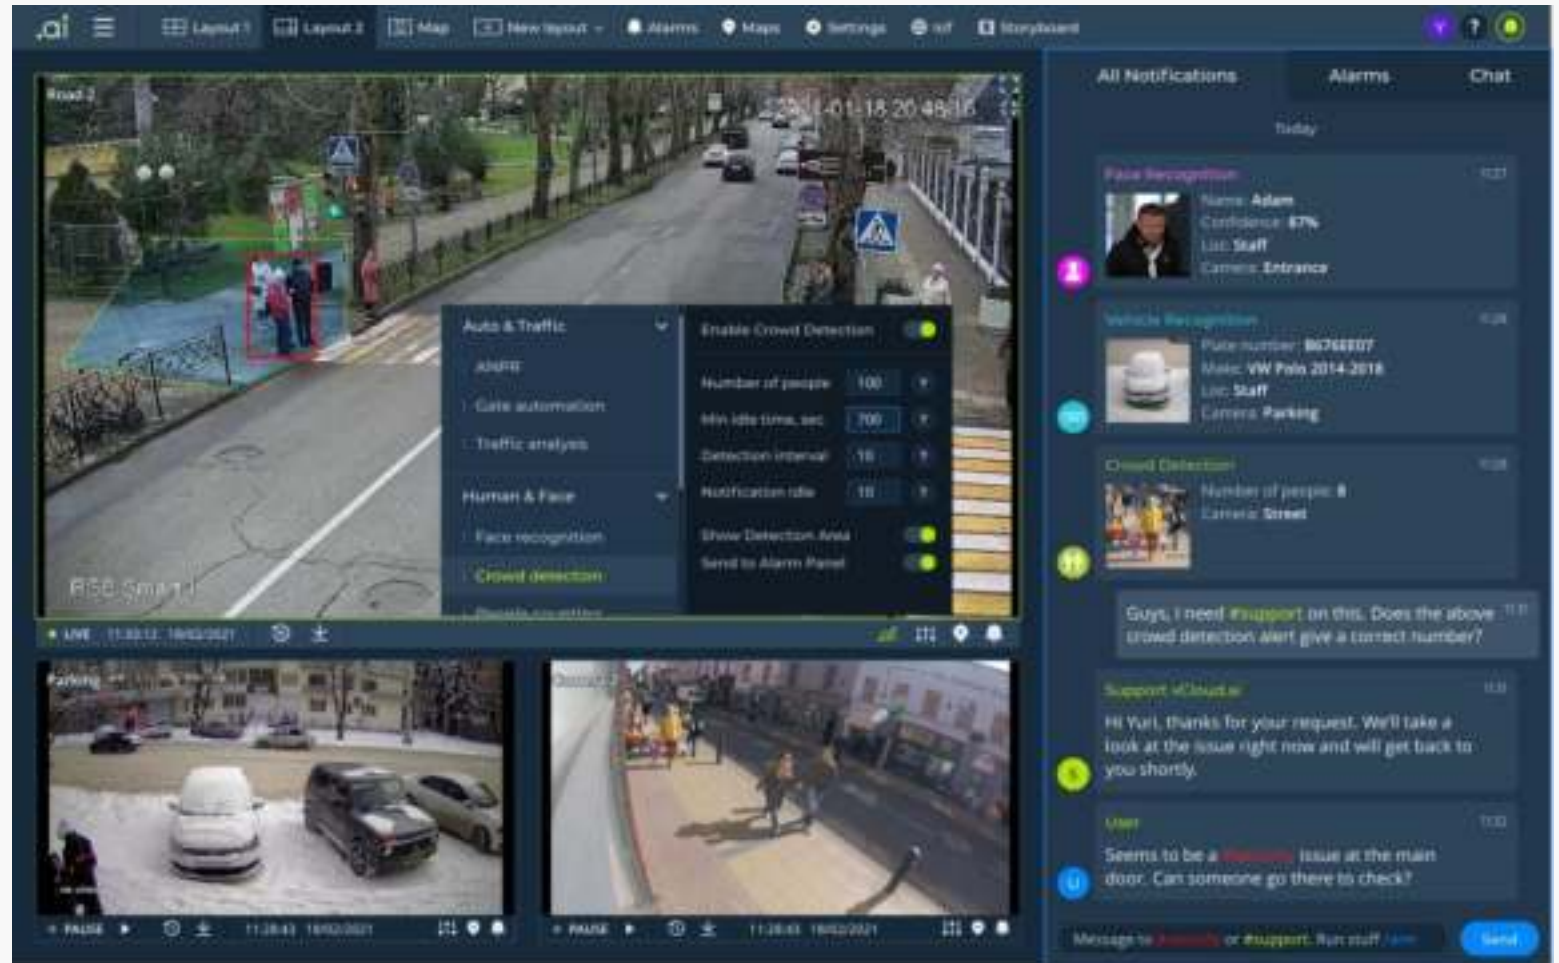

- Face detection
- Recognition by comparison with specified lists
- Attendance reports

Crowd detection

- Detects crowds of specific number of people
- Allows setting idle time
- Allows setting intervals between notifications

Auto number plate recognition

- High Accuracy
- Works in low visibility
- 55 Countries Supported
- Car Make & Model
- Colour
- Direction
- Gate Automation

Queue detection

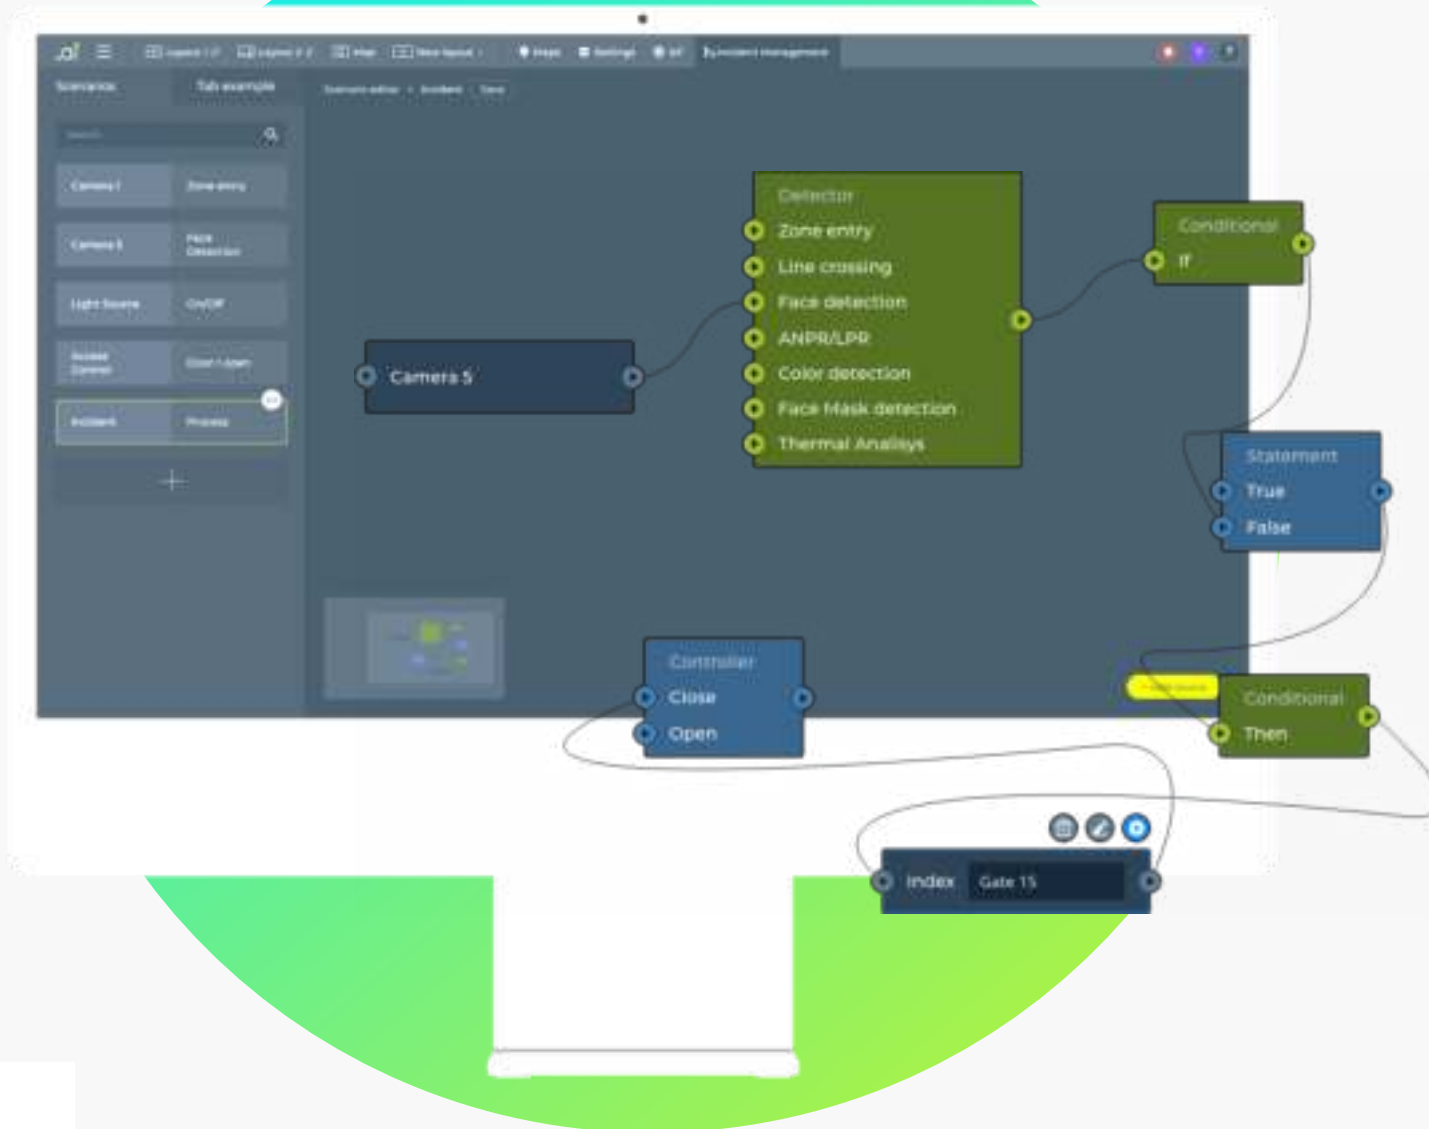

vCloud.ai detects queue lines in your retail and immediately notifies about it. Now you can make sure that the waiting time in your store is not irritating and well balanced.

People counting

vCloud.ai can count your visitors and report on that real-time or in diagrams of your choice. This detector can snap queues from top and from sides.

Heat maps

vCloud.ai can generate heat maps based on human activity in selected area. This can be applied in retail and other projects where traffic is important.

Incident management event automation tool

- Your rules across the system
- No-code API connection
- Milestone and Nx Witness
- Modbus, OPC and BACnet

ML Engine*

Create your own AI

- Create custom video analytics
- Create multiple model
- Add objects from archive
- Run on any cameras

* Roadmap 2021

Camera connection

vCloud.ai

Direct camera connection

Connect vCloud.ai supported cameras directly over an end-to-end encrypted connection.

vCloud Bridge

Use affordable Bridge to connect any analog or IP cameras over an end-to-end encrypted connection.
Price: \$50

...or any camera via RTSP
